**If you have any construction projects that might involve our detailing services, please give us a call.**

#### **What We Do.**

AMCA Draughting pride ourselves on our ability to reduce project costs through efficient and experienced design and provide a complete draughting service to the steel work industry. Using the latest 3D modeling and administration software our team of highly trained detailers and technical directors allow AMCA Draughting to deliver detailed steel drawings that are practical and accurate. With a team of friendly and devoted individuals AMCA Draughting offer the complete detailing package from design to after care and support during fabrication and installation.

## **Royal Opening for Hospital in the South West**

AMCA were proud to be part of the design team for the Acute Hospital South West Enniskillen. The grand opening of this state of the art facility took place on the 26th June 2012 by Her Majesty Queen Elizabeth II and is admired for its layout and design.

The input from AMCA's Detailers was instrumental in forming the delivery and erection sequences to ensure maximum efficiency on site. Through continuous co-ordination the design and erection teams requirements were accomplished.

Western Health and Social Care Trust Chief Executive Elaine Way said 'the building of a £276m state of the art acute hospital facility that will change the face of healthcare in the area is a once in a lifetime project'.

## **Saint Paul's Primary School Ratoath**

AMCA provided all detail fabrication and erection drawings in order for the Steel Fabricator to achieve the required programme on this rapid build project.

The new school building, designed to accommodate more than 600 pupils, was delivered as part of the Department of Education's Rapid Delivery Programme and took just 26 weeks to complete.

The two-storey school houses 24 classrooms, a large sports hall and additional accommodation for extra curricular activities. St Paul's has four special needs classrooms and a 72-space car park.
